

UNIVERSITY OF TORONTO
Faculty of Arts & Science

DECEMBER 2025 EXAMINATION

ENG 286 H1F –FINAL EXAM
DATA AND LITERATURE
Instructor(s): N. Leduc & K. Reid

Duration: 3 hours

*Do **not** turn this page until you
have received the signal to start.*

Aids Allowed: One 8.5x11 sheet double-sided

Write your name and student number below
(do this now), then read the instructions.

STUDENTS MUST HAND IN ALL EXAM MATERIALS AT THE END

Given Name(s):

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

Family Name(s):

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

Student Number (9 or 10 digits):

--	--	--	--	--	--	--	--	--	--

UTORid (e.g., pitfra12):

--	--	--	--	--	--	--	--

- As a student, you help create a fair and inclusive writing environment. If you possess an unauthorized aid during the exam, you may be charged with an academic offence.
- Turn off and place all cell phones, smart watches, electronic devices, and unauthorized study materials in your bag under your desk. If it is left in your pocket, it may be an academic offence. When you are done your exam, raise your hand for someone to come and collect your exam. *Do not collect your bag and jacket before your exam is handed in.* If you are feeling ill and unable to finish your exam, *please bring it to the attention of the exam Facilitator* so it can be recorded before leaving the room. In the event of a fire alarm, do **not** check your cell phone when escorted outside.
- Answer each question directly on the exam paper, in the space provided. Use “blank” pages for rough work, or for answers that did not fit elsewhere—*indicate clearly the pages that should be marked.*
- This exam contains 9 questions on 22 pages (including 2 “blank” pages), printed on both sides of the paper. *When you start, please make sure that your copy is complete.*

Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	TOTAL
6	6	6	4	3	2	12	12	25	76

Good Luck!

Question 1. [6 MARKS] Basic Python (5 minutes)

In the box beside each of the code snippets below, write the **type** of the value stored in **var**, or write “Error” if the code would result in an error. Recall that the basic Python types we used are **int**, **float**, **bool**, **str**, **list**, and **dict** (for dictionary).

<pre>var = "99"</pre>	
<pre>var = 3.0 / 2.0</pre>	
<pre>var = ["99"]</pre>	
<pre>L = ["99", "name", True, [1, 2], 3] var = L[2]</pre>	
<pre>L = ["99", "name", True, [1, 2], 3] var = L[-1]</pre>	
<pre>L = ["99", "name", True, [1, 2], 3] var = L[2:]</pre>	

Question 2. [6 MARKS] Python Multiple Choice Questions (10 minutes)

Part (a) [1 MARK] Select the option below that is printed when the following two lines are run.

```
name = "Ada"  
print(name * 3)
```

- ☐ An error message because strings can't be multiplied.
- ☐ 9
- ☐ Ada3
- ☐ AdaAdaAda

Part (b) [1 MARK] Select the option below that describes the contents of `var` in the line below.

```
var = "April is the cruelest month, breeding / Lilacs out of the dead land".split()
```

- ☐ A list of characters
- ☐ A list of words split on spaces
- ☐ A list of two phrases split only at /
- ☐ An error message because `.split()` needs an argument.

Part (c) [1 MARK] What is the result of the following code?

- ☐ 6
- ☐ 'abbccc'
- ☐ 3
- ☐ 'a bb ccc'

Part (d) [1 MARK]

A prof reports the results of a midterm to a class. They say that the average (mean) was 65%, but the median was 72%. Select **all** of the following statements that are true about this scenario.

- ☐ Because the average is lower than median there must be some very low marks.
- ☐ Because the average is lower than median there must be quite a few students with nearly perfect marks.
- ☐ More than half of the students got a mark higher than 65%.
- ☐ More than half of the students got a mark higher than 72%.

Part (e) [1 MARK] Select the option below that shows what the following code will print.

```
x = 10
if x > 10:
    print("A")
elif x > 3:
    print("B")
else:
    print("C")
```

- ☐ A
- ☐ B
- ☐ A and B
- ☐ C
- ☐ Nothing will print

Part (f) [1 MARK] Select the option below that gives the evaluation of this expression.

```
not False or False
```

- ☐ True
- ☐ False
- ☐ not
- ☐ Error
